

Total Asset Managers

Data Center Services

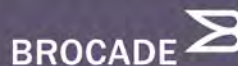

In addition to our third party maintenance offering for server, storage, and networking products, TAM offers various other data center customizable professional services to fit your unique needs.

Whether you're looking to relocate your data centers, install new upgrades, dispose of old assets, or need data erasure services that meet the latest DoD and NIST 800-88 guidelines, our dedicated team of highly trained field engineers, system engineers and project managers can help facilitate smooth delivery of your data center professional services needs.

TAM PROVIDES MAINTENANCE FOR SERVER, STORAGE, AND NETWORKING PRODUCTS SUCH AS:

✓ Data Center Hardware

Genuine data center hardware from all major OEMs. Certified engineers are prompt to ensure all hardware is quality tested. All hardware shipped to you includes an industry standard warranty with extended maintenance offering options at a fraction of manufacturer prices.

✓ Hardware Rentals

From one day to one year, our rental terms and custom contracts are the most flexible in the industry. Warehouse of fully tested inventory from all major manufacturers ready to ship to you.

✓ Asset Disposition

Complete IT asset disposition (ITAD) services that help you reduce risk and maximize recovered value. ITAD services include value recovery, data erasure, decommissioning, and compliant e-recycling.

✓ Trade In / Buy Back

Turn your old data center equipment into cash with our industry-first solution. It's simple: trade in used equipment get cash. If you are looking to buy new equipment, we can offer you a trade-in price for used assets.

✓ Hardware Maintenance

Cost-effective maintenance support for everything from entire data centers to individual parts. Benefits include: 50-70% savings compared to the OEM; flexible SLAs and contract terms to match your budget and requirements; support for EOL equipment; certified engineers

✓ Data Erasure

Perform data erasure using industry best practices to comply with internationally recognized standards, following the latest Dod and NIST 800-88 guidelines for media destruction. Each sanitized drive will receive a serialized certificate of data destruction for audit purposes.

✓ Data Center Migration

Help your customers conserve capital and develop migration plans that meet their specific requirements. From short term rentals to shipping and re-installation, we provide solutions that meet all of your customers' migration needs.

✓ Equipment Moves

Provide exceptional data center equipment moving services and help your customers develop a plan through auditing all assets and scheduling moves. Assist in unranking hardware, packing equipment for shipping, and transporting to the new location.

✓ Hardware Valuations

Auditing services that provide a complete inventory of all IT equipment down to the component level. We offer the best valuations in the industry due to our extensive network of customers for components, parts, and excess equipment.

✓ Cloud Migration IT Divest

Full Asset Lifecycle Services for your cloud migration with maximum value recovery for datacenter hardware.
